

Little Marine Warriors

Children will become marine detectives, reef builders and ocean rangers through fun, hands-on activities as they explore how we can help create and protect homes for marine wildlife. This session is ideal for students looking for an interactive introduction to marine conservation, local wildlife and caring for our oceans.

Age level

Prep - Grade 2.

Number of students per session

Up to 30 students per session.

Location

Beach (exact location to be determined with your school).

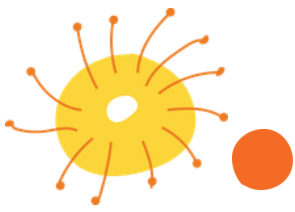

Duration

1 hour.

Timing

All year round (weather dependent).

What's involved

Students will learn about our native marine animals and the habitats they depend on through a series of fun, beach-based role-play activities (no water activities included).

Students will imitate marine animal movements, create a model reef habitat on the beach using provided materials, and take part in a simulated marine litter clean-up. Along the way, students will explore the impacts of pollution on marine environments and learn practical ways to help care for our oceans and waterways.

Optional sessions

Want to learn more about native plants and wildlife? Why not join a Seasonal Indicators in your Backyard, Buzz and Bloom or Seeds on Country session?
