

Little Marine Warriors

Little learners will learn about marine animals and the habitats they depend on through fun, hands-on, beach-based play activities.

Children will move like marine animals, create a pretend reef habitat and take part in an ocean ranger “clean-up the beach” activity. This session will help children to develop an appreciation for marine environments and learn simple ways to care for our wildlife.

Age level

3+.

Number of children per session

Up to 30 children per session.

Location

Beach (exact location to be determined with your ELC).

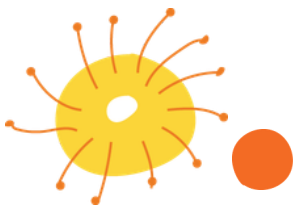

Duration

1 hour.

Timing

All year round (weather dependent).

What's involved

Little learners will discover our amazing marine animals and the habitats they call home through a series of fun, beach-based activities (no water activities included).

Children will move like marine animals, build a pretend reef habitat on the beach using provided materials, and become ocean rangers as they help clean up a simulated marine environment. Along the way, they will learn why healthy habitats are important, how litter can affect marine wildlife and simple ways they can help care for our oceans and beaches.

Optional sessions

Want to learn more about nature? Join us for a Discovering Bush Tucker or Little Explorers in Nature session.
